

MSS®-Mop Sanitation ML

Matic Liquid

Properties

It is the alkali concentrated main washing agent used in the MOP SIL System. It is suitable for use in all types of mop washing machines. Mops and cleaning cloths absorb and collect dirt, oil, protein residues and microorganisms on the floor and surface. Extremely dirty mops and cleaning cloths can be purified from such impurities only with a special cleaning chemical. It is a reliable washing product that cleans mops and cleaning cloths without wearing them. It is effective at any temperature. It is used with dosing systems, it is quite economical.

Composition: Contains Nonionic Y.A.M, alkaline substances, ion scavenger, complexing agent and dye.

Physical Characteristics: light yellow liquid

Usage Areas

The risk of contamination is important in institutions with high hygiene requirements such as hospitals, schools, kindergartens, nursing homes for the elderly. The MOP Delete system is an economical, ergonomic and fast system that such institutions can safely use. At the same time, shopping malls, hotels, airports, pharmaceutical factories, food production areas etc. Suitable for large areas such as

Usage and Amount

When MSS Mop Sanitation ML is used together with the auxiliary washing agent Mop Sanitation Oxy-L, its bleaching and disinfection power increases. Amount of usage:

In heavy pollution;

Water Hardness	In Soft Waters	In Medium Hard Waters	In Very Hard Waters
Dosage Amount	2 ml / 1 L	2,5 ml / 1 L	3 ml / 1 L

The adjustment of the dosing pumps is made by MSS Group Sales Technical Support Consultants and is checked periodically.

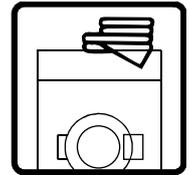

Storage

Store in a cool and dry environment. Do not stack more than two drums on top of each other.
