

MSS®-MOP Sanitation Sensitive

Cleaning and Maintenance Agent for Polished and Sensitive Floors, Surfaces

Properties

It is a concentrated cleaning agent used in the MOP SIL System. It provides effective cleaning on all kinds of surfaces and floors. Its suitability for sensitive surfaces has been tested and approved in accredited laboratories. MSS Mop Sanitation Sensitive does not damage the texture of mop and cleaning cloths and the applied surface, and does not leave any traces. It leaves a pleasant smell in the environment. It is suitable for washing at any temperature, it is economical and environmentally friendly.

Composition: Contains nonionic surfactant, solvent, perfume and dye.

Physical Properties: Pink colored liquid

Usage areas

The risk of contamination is important in institutions with high hygiene requirements such as hospitals, schools, kindergartens, nursing homes for the elderly. MOP Delete system is an economical, ergonomic and fast system that such institutions can use safely. At the same time, suitable for large areas such as shopping malls, hotels, airports, pharmaceutical factories, food production areas etc.

Usage

MSS Mop Sanitation Sensitive is suitable for use with dosing units in mop washing machines. In the final rinse, it is dosed into the machine and absorbed into the mops and cloths in the right amount homogeneously and at the right rate.

Amount of usage; 5 – 7 mL per 1 L of water

The adjustment of the dosing pumps is made by the MSS Group Sales Technical Support Consultant and is checked periodically.

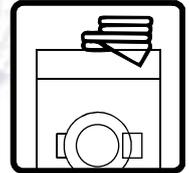

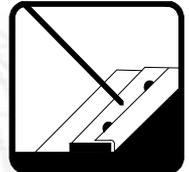

Note

If disinfection is also desired, use MSS Mop Sanitation Disinfect.
